

Technology Animation Parent Workshop

Parents are invited to a workshop that produces a clay animation project. This project will be the same type of project many students will be doing in class.

You might be familiar with “Wallace and Gromit” or the movie “Chicken Run”, and the new “Fantastic Mr. Fox.”, are all examples of clay animation. Our animations will be much shorter, but they will have a similar story to tell. Parents will work in groups and have to develop a story like the Hungry Caterpillar. This is a fun and exciting project for our students and we would like to introduce this technique to you.

We will provide the digital cameras and laptops for you to use. If we have more people than cameras, we will let you know. The laptops will have the programs loaded for you. There are some supplies that you would have to bring to complete the project. Please do not feel obligated to purchase all the supplies; this is just an example of what your children will be experiencing in class.

Supplies can be purchased at any Art Supply Store such as Michael’s Construction paper and any other additional products to make scenery
Claytoon™ modeling clay glue, scissors, and clear tape
The purchase of funny eyes can help give character to you clay model

Parents are being offered a discounted price for the Tech4Learning Frames 4 software. Usually \$54.00, the discounted price is \$38.00. Discount code: HUCVL005. The Flyer will be on the school website: <http://www.belleharborschool.org>

Send all responses to : Ms. Denise F. O’Connell
